Muadil parfüm esansı nedir?

Orjinal bir parfümün üst, orta ve alt notaları gaz kromatografisi (GC-MS) cihazıyla çözümlenir. Özgün koku profiline uygun aroma kimyasalları ve doğal/yarı sentetik hammaddeler seçilerek eşdeğer bir formül oluşturulur. Formül, orijinalin birebir kopyası değil; karakterine, notalarına ve koku profilindeki uyuma benzeyen bir alternatiftir. Benzerlik % 95'e kadar olabilir. Ortaya çıkan esans, “muadil esans” adını alır. Amaç, orijinal parfümün kokusunu daha ulaşılabilir hale getirmektir.
